Spinnaker Tower Portsmouth

Syntha Pulvin sails into port

Portsmouth's iconic Spinnaker Tower, described as 'one of the most spectacular design projects of the decade', is guaranteed to stay shipshape for years to come with Valspar's leading powder coating.

“ Syntha Pulvin was the ideal product for the Spinnaker Tower. Not only is the colour matched perfectly to the large amount of render used on the project, but the 25 year warranty offered at the time effectively closed the deal. ”

Chris Mansfield,
Commercial Director,
Metalion Ltd

Brief

Soaring 170m above Portsmouth's historic coastline, the Spinnaker Tower marks the completion of a massive £84m redevelopment scheme, 'The Renaissance of Portsmouth Harbour'. As the South Coast's latest major landmark, the sail-shaped project demanded the ultimate in powder coating finish and durability.

Solution

Valspar approved applicator Metalion Ltd applied Syntha Pulvin, specially mixed to replicate the colour of the external render, to the lift areas and observation deck.

Benefits

With both areas viewed up close by tourists and visitors every day, Syntha Pulvin's striking finish and market leading warranty were perfectly matched to the job.

And with previous Syntha Pulvin applications still going strong after three decades, the guarantee has been extended further, from 25 to 30 years – proving the product's status as the most reliable coating available in the industry today.

There are more than 100 colours available in the Syntha Pulvin Matt and Metallic ranges, all manufactured under carefully controlled conditions. Syntha Pulvin products are only supplied to approved applicators.

They are 100% recyclable and can be applied to aluminium and galvanised steel window frames, cladding panels, curtain walling, roofing and most architectural metalwork.

All products are fully weather resistant, prevent UV fade and offer thermal shock

Project: Spinnaker Tower, Portsmouth

resistance. Syntha Pulvin Matt's durability has even been tested successfully for five years in the hot climate of Florida – equivalent to more than 30 years in Northern Europe.

The full range complies with BS6496, BS6497 and BS EN 12206-1, is BBS Certificated and conforms to Qualicoat Class 1 and GSB standards.
